

TRIZfest-2024
Call for abstracts

Dear friends and practitioners of TRIZ,

As every year, your personal involvement is essential to make our Conference succeed. Whether you're submitting a paper, presenting groundbreaking research, or attending to share knowledge, your participation drives this event forward and makes it even more memorable.

We invite you to join us not only in discovering the combination of TRIZ & AI-driven innovation and its impact on sustainable global growth. We invite you to create a framework for such a combination and such development.

Please feel invited to submit abstracts of your works, including research and practical papers, case studies and project results descriptions. We accept a wide range of topics, yet related to the fundamentals of TRIZ methodology combined with AI usage in invention and innovation processes. We are also open to papers treating the topic of sustainable and ecological development based on TRIZ approach; TRIZ in mobility including electric, hybrid and hydrogen vehicles; TRIZ in pedagogy and TRIZ in industrial inventions of the 21st century.

We firmly believe that thanks to your extensive interests, your willingness to share your knowledge, and your enduring will to develop and promote the TRIZ methodology, this year's TRIZfest conference will be one of the most interesting and developing.
